

Custom Profile Target Instructions for Canon 6400/8400/9400 Printers

Use the Target named Custom Profile 11x17 Target.

This target has been sized to an 11x17 size sheet of paper.

The following criteria must be followed in order to print this sheet correctly:

In the ImagePrograf Printer Plug-In...

Main Tab

1. **Media Setting should be set to Special 5 for glossy or Special 9 for Matte.**
2. **Print Mode should be set to Highest**
3. **Output Profile must be set to None (No Color Correction)**

Page Setup Tab

4. **Make sure Enlarged/Reduced Printing is unchecked**
5. **Paper size is 11x17**
6. **Orientation is Portrait**
7. **{6400} Paper Source should be set to Manual (3mm Margins)**
8. **{8400/9400} Paper Source should be set to cut sheet and 13x19**

This file must be output at 100% no scaling. Do not make it smaller or larger. The color squares must remain at a specific size in order to be processed.

The entire target must be printed. All squares need to be clean and solid. No white spots, no smudges or scratches.

Please write in your customer information in the indicated spaces along with your printer make and model, paper type and media settings so we have a reference. Be sure not to write over any of the squares.

Once printed, mail them in a flat mailer to:

**Freestyle Photo & Imaging Supplies
Profile Service Department
5401 West Sunset Blvd
Hollywood, CA 90027**

Once received, we will scan the patches and create a custom profile. When complete we will email your new custom profile directly to you.

To load your profile:

On Mac OS, copy the file in to your Library – Colorsync – Profiles folder

On Windows, right click on the file and choose Install Profile.

When you start programs like Adobe Photoshop or Lightroom, your custom profile will appear in the profiles list.
